Have a safe and  
happy Easter!

## Science Day Success!

Several weeks ago, Normanby Primary school took part in a Science Day! The reason for this, was to raise the profile of Science and have a fun-filled day involving practical experiments and curiosity. Over the past six weeks, Normanby News have been interviewing the NPS staff and asking them what they did on that successful day and throughout the year. This whole school event, included the following extra-special investigations and experiments: catch a rainbow, classifying animals, filtering and food colouring. Speaking to a handful of Year 1 children they told Normanby News that:

'We enjoyed naming the animals and messing about with the washing up liquid and food colouring!'

## Postbox Power

A final thank you to all of the children who entered the 'Scientist Of The Term' competition. The competition is now closed and the winners from each year group will be revealed on the first Friday back (April 28th). Don't panic if you haven't entered, there will another competition with a new scientist beginning next term! Good luck to all the participants!

## How well do you know Professor Dunning?

Favourite Science lesson to teach?

I love teaching practical experiments and investigations.

When did you start being the NPS Science Leader?

Straight away! Mr. Faulkner asked me and I said yes of course

Favourite Science experiment?

When the unexpected happened in the bang and pop experiment!

If you could live on another planet except Earth?

One of Saturn's Moons.

(Mrs Dunning pictured right with our Normanby News students).
